**August 21<sup>st</sup> - 22<sup>nd</sup>.St. Lawrence Co. Rock & Mineral Club (?) Decision on the show is pending upon Covid limitations at the time of the show and attendance numbers for the event.**

## The Metaphysical Corner

### Fluorite

Macomb, NY

**Fluorite: The Stone of Positivity** This crystal is perhaps one of the most underrated but also one of the most powerful. This stone is known to quite literally suck negative energy and low vibrations from a space or your body, and create room for the light to shine in. Found in multiple color variations, fluorite is a truly magical crystal.

**Metaphysical healing properties:** Used for auric protection, to raise your vibration,

alchemize negative energy, and calming a chaotic mind. Rainbow fluorite is most known to stabilize the mind and amplify psychic connection and heighten intuitive powers.

**Physical healing properties:** This dynamic stone can be used when studying to clear the mind and sharpen focus. It can also be used to alleviate inflammation in the body, dissipate cold symptoms, and can be healing for the mucous membrane as well.

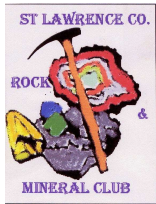

Below: Purple, colorless, and yellow fluorite slice

## Notes from the Prez

I received this note from clubmember Dennis Prezyna: State site has photos of NY minerals: [www.nysam.org/specimens.htm](http://www.nysam.org/specimens.htm)

# ROCK PICKENS

**ST. LAWRENCE COUNTY ROCK & MINERAL CLUB    Date: March/April 2021**

Also check out the link to the Rochester Mineralogical Symposium (RMS) presenting this year via Zoom for which advance registration is required. We've attended in person in the past and have found it to be entertaining, informative, delightful, hilarious at times; plus it affords opportunities to "grow" your collection and meet fellow collectors, old friends, mineral dealers, professors, students, researchers -- all sorts of interesting and delightful folks. Again, check it out. You can see some of the best examples of mineral photography worldwide presented by Jeff Scovil and Michael Bainbridge.

The Eastern Federation of Mineralogical and Lapidary Societies (EFMLS) is undergoing, or has undergone, recent changes which are pretty much obscure to the average clubmember. So in an effort to provide some insight and information as to what it's all about, I have included for you an interview of the President of the EFMLS, David Nock.

(I had to include as an attachment).
