The Metaphysical Corner

AMBER

Healing Properties of Amber

Amber carries the energy of the sun, warmth, and wellbeing. It is nurturing and good for people recovering from illness or who are needing comfort. It can transmute negative or stagnate energies into positive energy like a sunny day lifts the spirits. In this way it can be protective, letting you carry around a bubble of sunshine wherever you go. **Purifies body,**

ROCK PICKKENS

mind, and spirit. Balances electromagnetics of the body and allows even flow of energies. Provides a positive, soothing energy. Spiritualizes the intellect.

T-shirts \$5.00 to help with the cost of mailing and purchase. Please let us know what size and we will order a special "2020 no show" T-shirt for you. Shirt shown below.

Amber as a Gemstone Amber is fossilized sap or pitch from trees, and is usually golden brown and **translucent**. It can contain bits of plant material or insects – even bits of dinosaur feathers that were trapped in the sap and became fossilized with it. Amber has been used in jewelry for thousands of years.

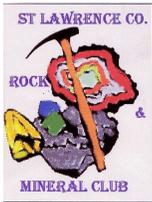

Uses: Abundance & Money, Nurturing, Physical Health, Protection, Purification

Color: Orange Gemstones, Yellow Gemstones

Notes from the Prez

ROCK PICKENS

ST. LAWRENCE COUNTY ROCK & MINERAL CLUB

Date: November/December, 2020

Dave Millis - AKA "Rock Doc", has been busy creating a house out of sheets of peeled Mica. You can see Dave's castle and other creations at the Gouverneur, NY Museum.

Something new on the horizon with respect to our Club's membership in EFMLS has to do with new leadership of the organization now headed by Dave Nock. He is working towards bringing clubs into more participatory roles in the organization, for lack of a better explanation on my part as the publication "deadline" for this letter has passed a while ago. There are several new features and offerings to report, best shown by the attachment which contains the minutes of the last EFMLS zoom meeting that I attended.

One of the really interesting and new things to come along down the pike is a new website called Geology365. More details to come and there's more in the attachment. I think it's going to be really exciting to utilize that website and weave some of its features into our club's activities.

Another website that I learned about is called "Mineral Expert". As I learn more about both I expect to be able to add more and varied content to the newsletter plus interact more with our website headed up by webmaster Glenn
